Christopher ARZUR

Senior PHP Developer Contractor

Zend Certified Engineer

With over a decade of professional experience as a PHP developer in France, I decided to move to London for greater personal and career opportunities. I am skilled in web technologies, focusing especially on back-end. I like to challenge myself, learn and share experiences which leads me to always look for new contracts opportunities.

Personal

Name	Christopher Arzur
DoB	21 Oct 1984
Nationality	French
Languages	French, English
Telephone	+44 7599 964070
Email	christopher.arzur@gmail.com

Backend skills

Education

Licence Professionnelle ATC Webmestre 2007

Equivalent to a BSc in computer science @ Aix-Marseille Université (FR)

DUT Informatique 2006

Equivalent to a HND in computing @ Université de Rennes 1 (FR)

Work

PHP Developer (contract) @ EAVO, London

Since 2017

EAVO is a digital marketing agency based in London.
As the main back-end developer, I'm in charge of the full development cycle from analysis to tests including developments and deliveries. When I started, I was in charge of the apps migration from CakePHP to **Symfony3**. Now I deal with several bank **APIs** such as PayXpert and Ogone for payments management.
I leverage Symfony bundles to solve for example **CRUD**, **REST API**, or even **AWS** issues

Full Stack Developer (contract) @ leManoosh, London

2017

LeManoosh is a web platform sharing industrial design ressources. Their website has a substancial traffic (6k visits day) and has a **Wordpress** core. Backend side, I have to deal with **Bedrock**, a Wordpress boilerplate and **MySQL. Codeship** is the selected delivery pipeline and **Bitbucket** the repository hosting service. Even if it's not my main focus, I'm in charge of the front-end side, developing against **VueJS**, **Blade** and **Webpack** for compiling and packaging js and sess.

Methodologies

Side project

Co Founder @ Skypaper.io

Since 2017

Skypaper is a side project I have been working on for 2 years now which empowers users to send physical postcards by post via a mobile application. Two others friends are in charge of the front-end part with **lonic**, whilst I'm in charge of the **Symfony** development, mainly based on **APIs** contracts between the app, the back-end and a third part which prints and sends the postcards. We use for example **JWT**, **Swagger**, **Sentry** and many bundles for the **SSO** or **Stripe** for the payments.

Work

PHP Developer (contract) @ LaComDesCom, London 2016/2017

An 8 months remote contract experience for a hotel booking platform aggregating offers from multiple online travel agencies (OTAs) and offering cashback on the bookings. I integrated OTAs via SOAP and **REST APIs**, implemented online payments and set up the search engine with Apache Solr.

PHP7, Zend Framework and MySQL was part of my development stack. As a remote developer, I had to pay attention to the communication with the client and the others developers to continue benefeting from the Agile methodologies.

Technical Manager @ Cognix Systems, Rennes (FR)

I joined as a PHP developer and a few years later I was offered the position of Technical Manager, essentially another term for Lead Developer. I was in charge of hiring and managing a team of 10 developers. Alongside those responsibilities, I worked on many projects, all based on Zend Framework. Most references are available on cognixsystems.com

During these years, I mainly developed against PHP5, MySQL, Zend Framework and also Smarty a web template system and jQuery for the **Javascript** side of things. The last years, I was in charge of the migration of the homemade CMS to Symfony.

I also passed the Zend Certification (ZEND019652)

Software Developer Engineer @ CGI, Rennes (FR) 2006/2010

Hired at the end of my internship, I mainly worked on extranet web applications for Orange Business Services. Some of my missions were related to JAVA and VB.NET but LAMP was my main stack.

After 4 years in this IT services company, I learnt all the basics in web development, especially in PHP, HTML and Javascript.
